GDAHC serves at the community level, bringing important health care stakeholders to the table, leading the conversation to work toward solutions. Opportunities to be the catalyst to address community needs and a combined vision, are spurred by conversations that start at events such as GDAHC’s Coffee & Controversy discussions, which allow for idea generation and exploration. Bringing in experts from various fields of knowledge, offering different perspectives and insights on a variety of topics, both controversial and educational, is an important role of GDAHC. GDAHC prides itself at being the table that allows for conversations to start, allowing ideas to be explored, and catalyzing collaboration to create healthier tomorrows.
